

## **2010 State 4-H Presentation Day – Impromptu Question**

### **Senior Question**

Our nation faces concern over global climate change and the need for identifying alternative fuel sources. What role do you think biofuels (fuel derived from biomass) can have on both the environment and human society?

## **2010 State 4-H Presentation Day – Impromptu Question**

### **Senior Question**

Childhood obesity is a growing concern. What role can 4-H activities play in improving children's nutrition and overall health?

## **2010 State 4-H Presentation Day – Impromptu Question**

### **Senior Question**

There are two primary analogies used to describe the United States: a mixing pot where cultures are mixed together versus a salad bowl where cultures are mixed yet retain their own unique characteristics. Which of these analogies is more accurate? Why?
