Participant Information

County	N
Colusa	13
Humboldt	26
Los Angeles	164
Mariposa	26
Napa	104
Placer	129
Sacramento	85
Sutter/Yuba	107
Tulare	47
Total	701

61.2% of the sample was female; 81.4% were campers (versus teen staff). 67.9% were in a club back home; 77.3% plan to return next year, 4.0% said no, and 18.7% weren't sure. The average age was 12.22 years (range was 7 to 19 years) and the average number of years attending camp was 2.57 (range was 1 to 10 years).

Outcomes

We asked a total of 30 questions about 4 outcomes:

1. Affinity for Nature
2. Responsibility
3. Friendship Skills
4. Confidence

Rather than analyze the 30 items individual, we tested to see if they “hang together” as a scale. They all should, as the first 3 are scales from ACA and the next one is a scale from a commonly used measure of positive youth development. First, we got the reliability of the scales. Ideally, scales will have an alpha reliability of .70 or higher. All scales look great.

Scale	Alpha
Nature	.88
Responsibility	.94
Friendship	.96
Confidence	.80

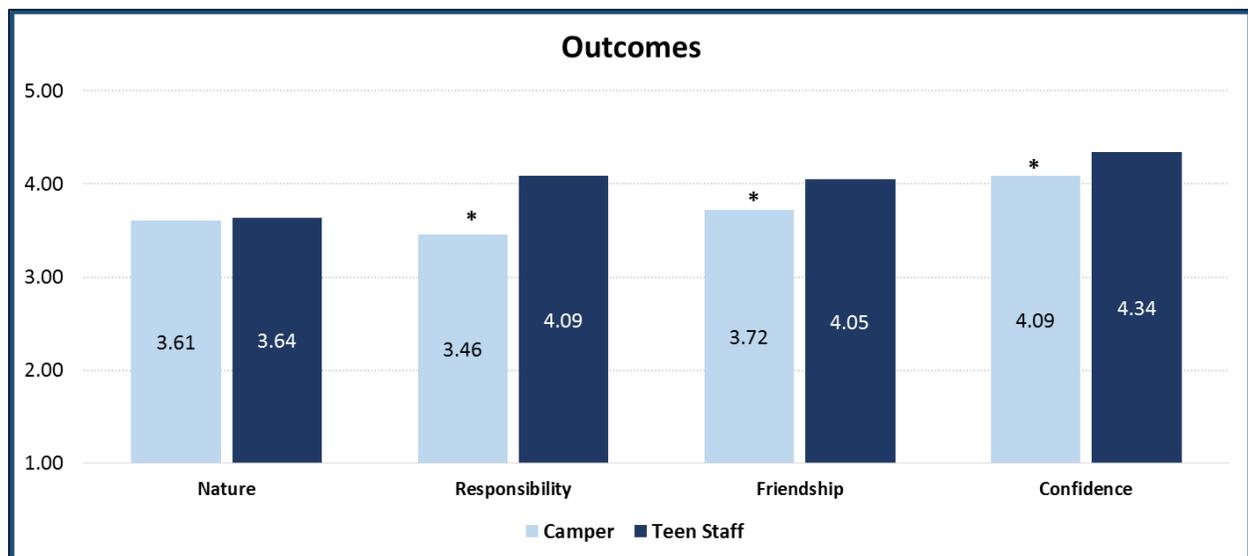

Next, we ran a test to see if all the items made 1 factor for their scale. For example, the responsibility scale has 4 items (of the 6 total) that ask about “mistakes”—do these 4 items hang together on 1 “factor” and the other 2 items make another “factor”? All tests showed that each set of items made up 1 factor, so we will make a scale for each set of items to analyze.

Mean Scores

Below are the mean scores of each scale, also divided up by whether the participant was a Camper or Teen Staff.

Scale	Overall	Camper	Teen Staff
Nature	3.61	3.61	3.64
Responsibility	3.58	3.46	4.09
Friendship	3.78	3.72	4.05
Confidence	4.12	4.09	4.34

We tested for differences in scores between Campers and Teen Staff, and found that **Teen Staff** scores were significantly higher than Campers on 3 outcomes: Responsibility, Friendship, and Confidence.

Note: For Affinity for Nature, Responsibility, and Friendship Skills, the scale is 1= Decreased, 2= Did not Increase or Decrease, 3= Increased a Little Bit, 4=Increased Some, I am Sure, and 5= Increased A lot, I am Sure. For Confidence, the scale is 1=Strongly Disagree, 2=Disagree, 3=Neither Agree nor Disagree, 4=Agree, 5=Strongly Agree.

Rating of Camp

Scale	Overall	Camper	Teen Staff
Mean rating of camp	8.44	8.41	8.65

There is no significant difference in the rating of camp between Campers and Teen Staff.

Previously it has been found that youth who rated camp higher had higher scores on the outcome scales. We tested this again, for the whole group and by whether the participant was a Camper or Teen Staff. We used correlations to test the relationship between rating of camp and the outcomes; low correlations (low relationship between the variables) is 0-.30, a moderate relationship is .31 to .59, and a high relationship is .60 to 1.0. The correlations are the table below; for example, the relationship between the rating of camper and the Nature scale for the overall sample is .47. There were no significant differences between the Camper and Teen correlations.

Scale	Overall	Camper	Teen Staff
Nature	.47***	.47***	.42***
Responsibility	.45***	.43***	.49***
Friendship	.46***	.46***	.45***
Confidence	.35***	.36***	.20**
