

## 2017 Camp Evaluation-Camper Outcomes

### Participant Information

County	N
Humboldt	44
Los Angeles	175
Marin	110
Mendocino	60
Napa 1	135
Napa 2	120
Riverside	41
Sacramento	98
Santa Clara	115
Sonoma 1	127
Sonoma 2	91
Sutter/Yuba	57
<b>Total</b>	<b>1173</b>

59.7% of the sample was female; 74.7% were campers (versus teen staff). 65% were in a club back home; 81.6% plan to return next year, 3.6% said no, and 14.8% weren't sure. The average age was 12.58 years (range was 7 to 19 years) and the average number of years attending camp was 2.93 (range was 1 to 18 years).

### Outcomes

We asked a total of 28 questions about 5 outcomes:

1. Affinity for Nature
2. Independence
3. Friendship Skills
4. Self-Efficacy
5. Emotional Safety

Rather than analyze the 28 items individually, we tested to see if they “hang together” as a scale. They all should, as the first 3 are scales from ACA. Items included in the fourth scale were taken from the 4-H Social-Emotional Common Measures. The final scale was adapted from items piloted in other youth development programs. First, we got the reliability of the scales. Ideally, scales will have an alpha reliability of .70 or higher. All scales look great.

Scale	Alpha
Nature	.89
Independence	.92
Friendship	.94
Self-Efficacy	.87
Safety	.88

Next, we ran a test to see if all the items made 1 factor for their scale. For example, the independence scale has 3 items (of the 6 total) that ask about “help from adults”—do these 3 items hang together on 1 “factor” and the other 3 items make another “factor”? All tests showed that each set of items made up 1 factor, so we will make a scale for each set of items to analyze.

## Mean Scores

Below are the mean scores of each scale, also divided up by whether the participant was a Camper or Teen Staff.

Scale	Overall	Camper	Teen Staff
Nature	3.67	3.63	3.81
Independence	3.75	3.65	4.07
Friendship	3.67	3.59	3.90
Self-Efficacy	3.96	3.86	4.27
Safety	4.24	4.17	4.46

We tested for differences in scores between Campers and Teen Staff, and found that **Teen Staff** scores were significantly higher than Campers on all 5 outcomes: Nature, Independence, Friendship, Self-Efficacy, and Emotional Safety.

*Note: For Affinity for Nature, Independence, and Friendship Skills, the scale is 1= Decreased, 2= Did not Increase or Decrease, 3= Increased a Little Bit, 4=Increased Some, I am Sure, and 5= Increased A lot, I am Sure. For Self-Efficacy, the scale is 1=Not True at All, 2=A Little True, 3=Somewhat True, 4=Usually True, 5=Very True. For Emotional Safety, the scale is 1=Strongly Disagree, 2=Disagree, 3=Neither Agree nor Disagree, 4=Agree, 5=Strongly Agree.*

## Rating of Camp

Scale	Overall	Camper	Teen Staff
Mean rating of camp	8.68	8.62	8.85

There is a significant difference in the rating of camp between Campers and Teen Staff.

Previously it has been found that youth who rated camp higher had higher scores on the outcome scales. We tested this again, for the whole group and by whether the participant was a Camper or Teen Staff. We used correlations to test the relationship between rating of camp and the outcomes; low correlations (low relationship between the variables) is 0-.30, a moderate relationship is .31 to .59, and a high relationship is .60 to 1.0. The correlations are the table below; for example, the relationship between the rating of camper and the Nature scale for the overall sample is .47. There were no significant differences between the Camper and Teen correlations.

Scale	Overall	Camper	Teen Staff
Nature	.38***	.38***	.38***
Independence	.25***	.25***	.21***
Friendship	.32***	.31***	.30***
Self-Efficacy	.23***	.21***	.25***
Safety	.54***	.52***	.59***

## If you could change one thing about camp, what would make it better?

- How the night hike was organized. The night of was very chaotic and they were short on staff and none of the youth leaders really knew where to go.
- 2 more hours of free time
- I would have more dairy free options. So many things only have cheese.
- Wake up later, and shorten short courses

- A little bit quieter and bed time.
- Make the gaga ball pit ground not as hard.
- A little bit shorter short-courses and longer free time.
